

Mediterranean arc Tsunami risk

Did you know ?

The Mediterranean arc, coastal region, could be exposed to tsunami generated by strong earthquakes off the coast of France, Italy and Maghreb. The beaches, the ports and the urban zones closest to the sea could be impacted.

Anticipate to react quickly !

Learn to recognize the previous signs announcing a tsunami.*

Identify by yourself the quickest way to join the highest land point.

Think of putting your family in security by preparing an emergency kit and a family procedure.

Alerts to the population

In case of a tsunami, the best reflex is to put yourself in safety, on the high level land points, without waiting, taking with you the emergency kit, and this, for several hours, because the first tsunami wave is not often the highest.

Sirens.

Automatic alert messages.

Directives given by the municipal police and beach life guards.

* Previous signs of a tsunami :

If you perceive one or several of the following forerunners:

- A powerful or prolonged earthquake
- An abnormal variation of the sea level
- A deafening and unusual noise

Evacuate immediately the coastal areas without waiting for the official alerts !

Tsunami : good manners to adopt

Join immediately the high level land points by foot.

- Go quickly by foot far away from the coastal areas (beach, port ...) until you reach a high level land spot.
- Climb up to second or the third floor of a building.
- Climb up a tree in case of no other solution.

Respect the directives given by the authorities.

Don't drive.

If you are sailing at sea, go to the large.

Stay at a safety place until the authorities declare the end of the danger, which could take many hours.

THE EMERGENCY KIT

Think about it TODAY !

Personnalise the content of your emergency kit according to personal needs. Put it away in a place accessible to all the members of the family.

The emergency kit must be equipped with medicines, food and information equipment :

- | | |
|---|---|
| <input type="checkbox"/> Water, long conservation food | <input type="checkbox"/> Candles, matchsticks, cigarette lighters |
| <input type="checkbox"/> First aid kit | <input type="checkbox"/> Whistle |
| <input type="checkbox"/> Medicines | <input type="checkbox"/> Copies of your personal papers |
| <input type="checkbox"/> Garbage bags | |
| <input type="checkbox"/> Pocket lamp, radio and batteries | |

Cross check the material in your kit and control regularly the expiry date of the different elements.
